

PORTFOLIO

Siti Raudatul Jannah

ABOUT ME

Hi! I'm **Siti Raudatul Jannah**, often called **Rauda**. I was born in Bondowoso and currently living in Sumbesari, Jember. With a background in Software Engineering, I'm now exploring the world of Informatics. Beyond coding, I'm deeply drawn to graphic design, where I bring ideas to life using Adobe Illustrator and Figma. Lately, I've been diving into ocean-inspired themes, blending creativity with calm, flowing visuals. Design, to me, is a space to grow, express, and collaborate.

EDUCATION

Jember University

Informatics

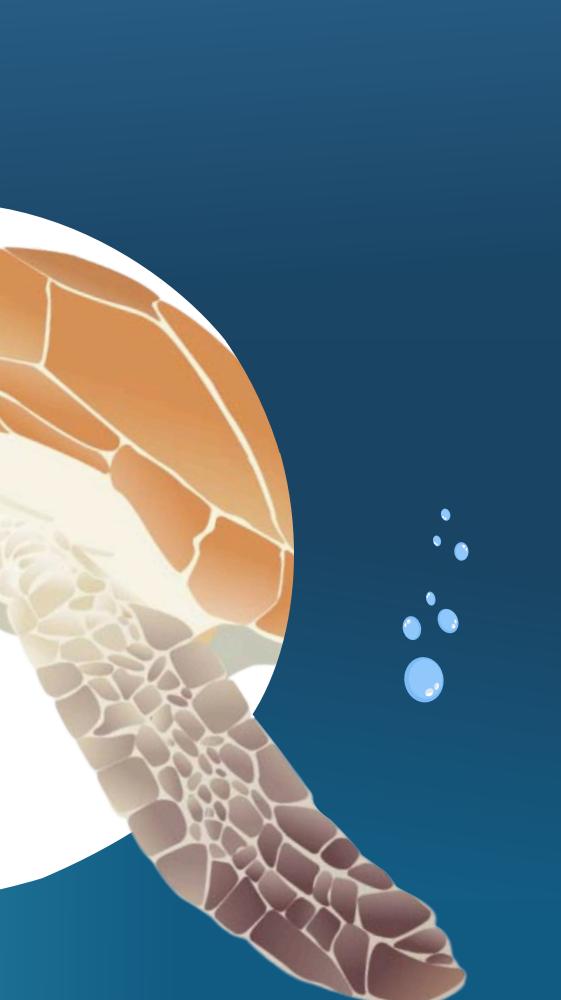

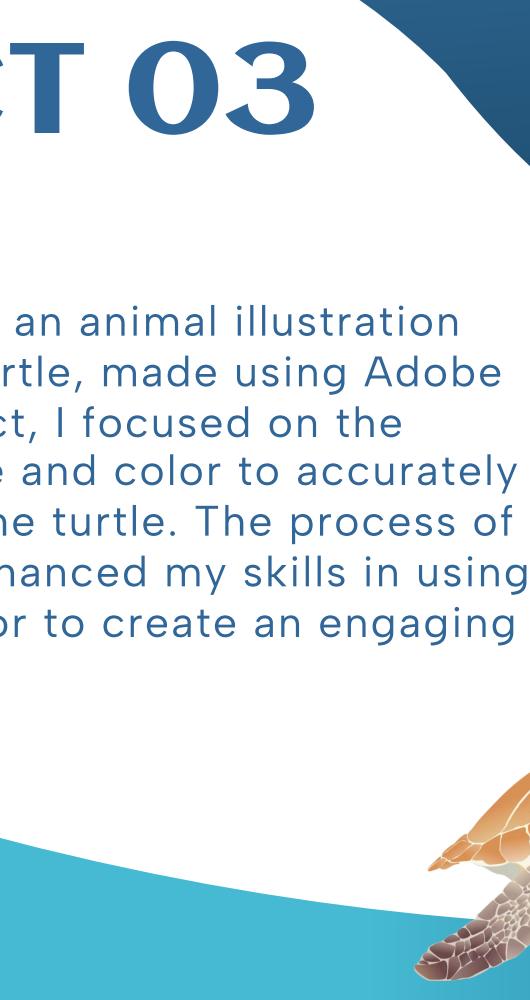

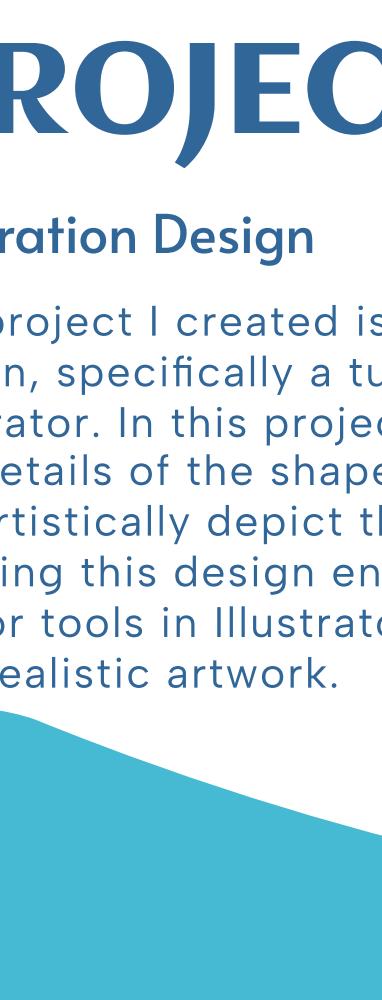

Currently studying Informatics, where I explore topics such as software development, web technologies, data analysis, and computer systems. This path allows me to strengthen my technical skills while supporting my creative interests in digital design.

SMKN I Bondowoso

Software Engineering

Graduated from a vocational high school with a focus on software engineering. I gained hands-on experience in programming, debugging, and building applications, as well as developing problem-solving and teamwork abilities.

PROJECT

PROJECT 01

Resume Web

This project is a website created for a course assignment. It summarizes lecture materials and presents them in a clear, accessible format, making it easier for visitors to review key topics.

UI Design

This ocean-themed UI design uses soft wave shapes, blue gradients, and marine elements to create a calm and refreshing interface. It blends clarity with creativity, offering a smooth and visually engaging user experience.

PROJECT 02

UI Design

This UI design was created as an initial prototype for a school project during vocational studies (SMK). It includes login pages, dashboards, and content sections with a clean, organized layout. The design focuses on usability, clarity, and easy navigation for users. It served as the foundation for developing the final functional website.

PROJECT 03

Illustration Design

The project I created is an animal illustration design, specifically a turtle, made using Adobe Illustrator. In this project, I focused on the details of the shape and color to accurately yet artistically depict the turtle. The process of creating this design enhanced my skills in using vector tools in Illustrator to create an engaging and realistic artwork.

CERTIFICATE

Competency Certificate

I obtained a Competency Certificate in Software Engineering, issued by the Professional Certification Institute (LSP) and accredited by the National Professional Certification Agency (BNSP). This certification validates my skills and qualifications in software development.
